

# How to Use PowerSheen Tire Brite

## Step One

**Directions:** Use PowerSheen Cleaner with a brush to remove "all" Silicone. Continue until white suds appear and tire is clean. Rinse tire with water. Repeat as necessary. Move to Step 2: Apply Product

**Tip:** You can use PowerSheen Tire Brite on ANY TYPE vehicle tire without damaging the tire.

## Step Two

**Directions:** Coat the cleaned tire evenly using the Tire Brite formula applicator. For a deeper shine, apply two coats.

**Tip:** Remember, a single application of PowerSheen Tire Brite can last up to six months, longer than any other tire dressing on the market. Our no sling formula improves tire life and gives tires the shine you are seeking.

## Step Three

**Directions:** Use Tire Brite on all your vehicles. Tell your friends about the product and get rewarded for the referral.
